Summary

Frontend Engineer with 3+ years of experience building React and Next.js applications using TypeScript, GraphQL, and Apollo Client. Experienced with TanStack Query, Redux Toolkit, Saleor, and Cloudflare. Specialized in performance optimization, accessibility (WCAG 2.1 AA), reusable component architecture, and CI/CD automation across ticketing, analytics, HRMS, and facial-recognition platforms.

Experience

Software Engineer

Spectacom Global Private Limited

Feb 2023 – Present

Gurugram, India

GetMyBib – Ticketing Platform

- Owned and architected 25+ reusable Next.js and React components across 15+ event flows, cutting feature development time by 40%.
- Engineered 15+ Formik and Yup forms with GraphQL and REST API integration handling 5,000+ daily submissions, slashing validation errors by 60%.
- Delivered live ticket management and check-in features (QR scanning, webcam capture, Google Maps) serving 10,000+ attendees at large-scale events.
- Reduced LCP from 4.1s to 1.6s via lazy loading, memoization, image optimization, and route-level code splitting across 200+ routes.
- Boosted Lighthouse SEO score from 68 to 95 while ensuring WCAG 2.1 AA compliance through semantic HTML and ARIA roles.

MasterDashboard – Analytics Platform

- Designed secure role-based dashboards for 5 user types with GraphQL-backed authentication guards and dynamic routing.
- Created reusable Highcharts and table components using TanStack Query, shrinking dashboard delivery time from 3 days to 6 hours.
- Implemented virtualized tables supporting 50,000+ rows with smooth rendering using react-window.
- Integrated Apollo Client with GraphQL queries for real-time data fetching across operational monitoring and reporting.

Snapdme – Facial Recognition App

- Led frontend development for Snapdme v2 using Next.js and TypeScript, delivering the product in 11 weeks.
- Designed chunked upload pipelines with real-time previews, shrinking average upload time from 22s to 8s.
- Optimized GitHub Actions CI/CD and deployed via Cloudflare Pages, cutting release time from 45 minutes to 8 minutes.
- Enabled instant selfie-based facial matching and photo discovery, improving user engagement and event experience.

HRMS – Management System

- Owned development of Leave, Reimbursement, and RBAC modules streamlining HR processes for 50+ employees.
- Delivered dashboards for Admin, HR, Manager, and Employee roles with GraphQL mutations and queries powering all data operations.
- Authored 12+ reusable custom hooks and shared utilities adopted across 4+ internal projects.

Intern – Frontend Engineer

Refactor Academy

Jul 2022 – Jan 2023

Bengaluru, India

- Shipped 10+ responsive React applications with Lighthouse mobile performance scores above 90.
- Resolved 40+ UI issues and improved cross-browser compatibility across Chrome, Firefox, Safari, and Edge.
- Strengthened component-level testing practices and eliminated recurring UI bugs through structured debugging.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Redux Toolkit, TanStack Query (React Query), SWR, Saleor

Styling: Tailwind CSS, SCSS, Material UI, Styled Components

Testing: Jest, React Testing Library, Cypress, Storybook

Tools: Git, GitHub Actions, Webpack, Vite, Cloudflare Workers/Pages, Chrome DevTools

APIs & Data: GraphQL, Apollo Client, REST APIs, WebSockets

Practices: Performance Optimization, Accessibility (WCAG 2.1 AA), CI/CD, Code Reviews, Responsive Design

Education

Shyama Prasad Mukherjee College, Delhi University

B.Sc. (Hons) Computer Science

Delhi, India

Jul 2019 – May 2022
